

This was quite a large space to play with the elements for a rooftop garden and we have made it like a space where inhabitants can spend their leisure times blissfully under open sky, sitting on the comfortable chairs inside a Pergola, swing beside a vertical garden, soothing greenery around them in the tray planters throughout the parapet wall and sound coming from the falling water in the waterfall.

*The photos of the site before beautification:*

The plan was to create an unreal feel for the visitors by installing large palm trees along with end numbers of floral plants blooming for all seasons throughout the year, mixed bamboo plants with different breeds of tropical plants for the vertical garden and planter trays. Turning the visible wall of the overhead water reservoir to blade waterfalls with a vertical garden was a fantastic idea to add value to the aesthetics of the place.

A low height platform was created to be used as a stage for any shorts of cultural events performed mainly by children living in the apartment or any other amusement activities. A pathway planned to make the movements easy for the maintenance guys to move around with the accessories they usually carry during the maintenance works. Having ample numbers of seating arrangements was an important matter and that's exactly why exterior quality benches, chairs, swings have been proposed to the concerned authority. Also choosing artificial grass not more than 35mm in thickness was recommended to avoid extra efforts for regular maintenance. The step garden in the corner was planned to create a havoc impact on the eyes of the viewers visiting the place as this was on the roof of 11th floor.

Above: a view of the **Pergola** with the **Seating Arrangements** and **Slick Tray Planters** to enhance the beauty of the floor.

Below: Adding a **Pebble Pathway** beside the **Waterfalls** to give a stunning feel to that space.

Left: a beautiful **Vertical Garden Panel** created to cover up the not that great looking **staircase** connected to the **lift machine room** behind it.

Left and below: planning the **lighting** for the place was reflected in reality by **enhancing the excellence** of the place in all aspects.

"Wow!! This literally feels like I'm in a better place than my hometown" said a NRI lady, originally from Thailand, standing there with a glow on her face and that's the extreme satisfaction for us by creating this site with excellence and elegance.
