

A SPIRITUAL CENTER IN OUTSKIRT OF HYDERABAD. (ONGOING PROJECT)

A peaceful location located just two hours from Hyderabad city has been chosen for this initiative aimed at establishing a center for those seeking spirituality and engaging in religious practices.

While it serves this purpose, the organization's members requested that we design the concept with a modern aesthetic and an abundant incorporation of greenery, alongside contemporary facilities such as a pergola, playground, botanical garden, and lotus pond.

By analyzing the existing space, we developed a concept that encompasses everything essential for this site. As you can see, the concept includes all the desired amenities for this project, and we will make sure it features a contemporary aesthetic while also having an inviting appeal and providing a soothing experience for the residents.

Although it spans no more than two acres, we are thrilled to have achieved a compact design that features abundant landscaping, garden plantings, walking paths, and outdoor seating. A substantial pergola with an attached string waterfall encircles a large lotus pond shaped like a ring, complemented by vibrant linear plantings. We have designated a sizable circular area for meditation under the open sky, along with an expansive playground situated nearby.

At the northern end of the property, a botanical garden will include a winding path for botany enthusiasts and will take on a magical ambiance at night thanks to the fairy lights included in the project's lighting plan.

the botanical garden at the northern end side of the premises will have a zigzag pathway inside for the botany enthusiasts and it will have a supernatural look at the night with the fairy lights which is the part of the illumination plan for this project. That's the spirit, that's how we have planned for it...
