

THE SELF EQUIPPED PROJECT INSIDE A DEEP FOREST:

NAKAJURI, A LARGE EXTENSION OF A HUGE FOREST AREA KNOWN AS JAIPUR JUNGLE IN BANKURA DISTRICT, WEST BENGAL HAS A BEAUTIFUL ENVIRONMENT EXACTLY SUITABLE FOR A MAKESHIFT PROJECT, LIKE A HOMESTAY OR A RESORT. MOMENT WE HAVE SEEN THIS LAND AT THE TIME OF FIRST SURVEY, IT WAS CLEAR THAT THIS PROJECT NEEDS TO BE BUILT AS A SELF EQUIPPED PROJECT IN TERMS OF GENERATING ELECTRICITY, NEED FOR FUEL IN KITCHEN AND REQUIREMENTS OF CROPS AND VEGETABLE ETC IN DAILY BASIS FOR HOSPITALITY UNITS. SO, WE SUGGESTED TO BUILD A CHAIN SYSTEM OF USING BIODEGRADABLE WASTE AND CULTURED INGREDIENTS FOR MAKING INFLAMMABLE GAS IN BIO-GAS UNIT WHICH CAN BE USED FOR RUN THE GENERATOR, PRODUCING ELECTRICITY FOR THE TOTAL HOSPITALITY UNITS AND OFFICE PREMISES AS WELL AS DIRECTLY FOR EVERYDAY COOKING AND GHEE PRODUCING UNITS. ALSO A LARGE LAND AREA OF THE PROJECT HAS BEEN DEDICATED FOR MAKING THE KITCHEN GARDEN AND A MINI DAIRY FARM, PRODUCING ORGANIC VEGETABLES AND MILK PRODUCTS REQUIRED FOR KITCHEN TO CATER THE GUESTS AND VISITORS.
