

## A cozy Resort Project in Keonjhar, Odisha ( ongoing project )

Odisha boasts a rich cultural heritage, and Keonjhar is surrounded by the stunning beauty and wonders of nature, which we carefully considered during the development of this resort while staying within the budget constraints.

Although the overall area is about 2 acres, we have initially begun with 1 acre by constructing 5 to 6 cottages along with a spacious hall for destination weddings, corporate conferences, and more. In the future, we plan to expand further.

An appealing yet simplified landscape is a significant draw for this location, and we intend to offer organic vegetables on the food platters for our guests and visitors. The vegetables will be grown on our organic farmland, which we've established on the remaining acre of land.

The region is enclosed by mountains, waterbodies, and dense forests, making it ideal for a getaway. Additionally, the location is just a kilometer from the main highway and only a few kilometers from the nearest town and train station. This allows visitors and guests to easily access the resort while enjoying the ambiance of a forest and views of the mountain range.
